These forecasts are not endorsed by Airtel Africa plc, nor does Airtel Africa plc assume any obligation to update or revise consensus to reflect circumstances arising after the date of collation.

This consensus has been compiled by Airtel Africa plc as of 31 March 2025 as the arithmetic mean of forecasts provided by 10 registered investment analysts.

The firms contributing to the consensus request include: ABSA, Bank of America, Barclays, Cardinal Stone, Citi Research, Goldman Sachs, HSBC, New Street Research, SBG and Deutsche Bank

Operating free cash flow is an alternative performance measure (non-GAAP), calculated by subtracting capital expenditure from underlying EBITDA.

Analysts' forecasts are presented on a 'reported currency' basis. These include inherent assumptions for currency forecasts which are specific to each individual broker. In our latest results report for 3Q'26, Airtel Africa highlighted the following currency sensitivities:

"With respect to currency sensitivity going forward, over a 12-month period and assuming the movement occurs at the beginning of the period, a further 1% movement of the USD against all OpCos currencies would result in an estimated impact of \$58m-\$60m on revenues, \$29m-\$31m on EBITDA and \$26m-\$28m on foreign exchange (excluding derivatives). Our largest exposure is to the Nigerian naira, where a similar 1% USD movement would result in an estimated \$14m-\$15m impact on foreign exchange (excluding derivatives)."
