

Get closer to your customers with Africa's largest network of data centers

Powering Africa's digital future

Nxtra by Airtel Africa, is the data center and colocation services arm of Airtel Africa Plc, established to build one of the continent's largest, most secure, scalable, and sustainable digital infrastructure platforms. As an extension of the Nxtra platform into Africa, it brings together proven data center expertise, decades of telecom and network leadership, and the pan-African scale of the Airtel ecosystem. Backed by the global strength and long-term vision of Bharti Airtel, Nxtra Africa delivers a highly connected ecosystem of hyperscale, core, and edge data centers—empowering enterprises, cloud providers, startups, and governments with the reliability, flexibility, and proximity needed to accelerate digital growth, support cloud and AI workloads, and drive Africa's digital and economic transformation.

Grow with us!

Our Promise for Africa's Digital Growth.

To power Africa's digital future, Nxtra by Airtel is building continent's largest and most advanced network of state-of-the-art data centers.

We aim to create a globally connected ecosystem that strengthens Africa's digital infrastructure, enabling seamless access to scalable solutions for cloud, artificial intelligence (AI) and next-generation technologies.

By fostering innovation and connectivity across Kenya, Nigeria, the DRC and beyond, we strive to accelerate economic growth and position Africa as a leader in the global digital economy.

Newly launched Flagship Facilities

Lagos - Eko Atlantic LOS1

Strategically Located in Lagos, Nxtra Africa's LOS1 Data Center is designed to be the cornerstone of Africa's digital transformation.

- ✓ **22 MW IT Power | 38 MW Total Power**
- ✓ **~30000 Sqm | G+5 floors**
- ✓ **Carrier-neutral with 4 diverse fiber paths**
- ✓ **RFS: Q2 2027**

Nairobi - Tatucity

NB01

Located in Nairobi—Nxtra's NBO1 data center campus is more than infrastructure; it's Africa's gateway to the future. Purpose-built for AI, cloud, and high-performance computing

- ✓ **24 MW IT Power | 44 MW Total Power**
- ✓ **~45000 sqm | 2 buildings**
- ✓ **Direct access to dense fiber routes**

Kinshasa - Pigeon

KIN1

A next-generation data center in Kinshasa enabling cloud, connectivity, and innovation that connects the DRC to the wider African and global digital economy.

- ✓ **5.28 MW IT Power | 9 MW Total Power**
- ✓ **~9200 sqm | G+3 floors**
- ✓ **Carrier-neutral with multiple fiber paths**
- ✓ **RFS: Q3 2027**

Salient features of our data centers

Design

concurrently maintainable, PoD-based, modular and scalable architecture

Security

Comprehensive, multi-level security adhering to global standards

Connectivity

Low-latency, carrier-dense and rich interconnection services

Reliability

99.999% availability backed by industry-leading SLAs

Sustainability

Green energy-powered data centers with highly energy-efficient design and operations

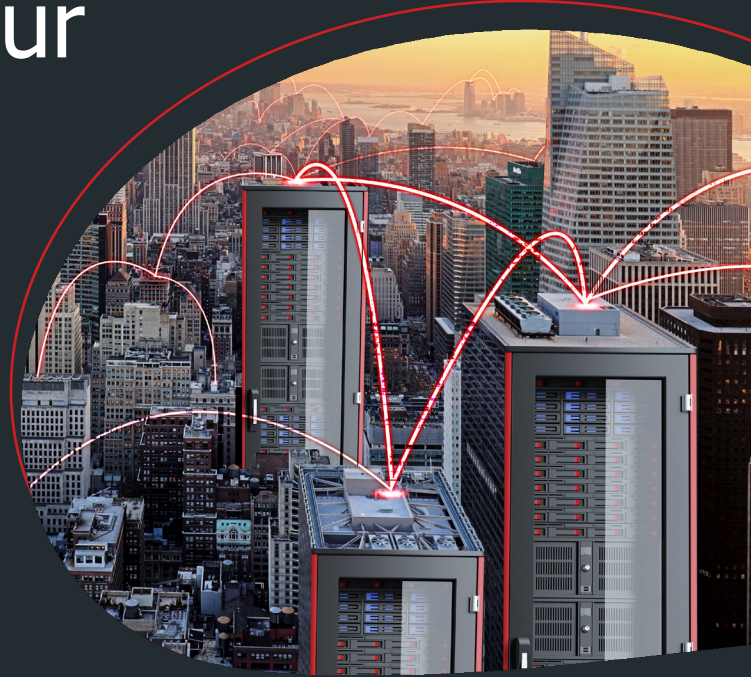

Services for all your business needs

Colocation

Secure, scalable and sustainable space to power your digital needs

- Cages and Cabinets
- Private Suites
- Power Shells
- Dedicated Data Center

Interconnect

Seamlessly connect, bridge and integrate your infrastructure

- Cross Connect
- Metro Connect
- Cloud Connect

Bespoke

Custom-built security and fit-outs to meet your elastic needs

- Cages and Cabinets
- CCTV and Access Control
- Mechanical and Electrical
- Intelligent BMS and Building Automation

Migration

Ensure flawless move to your new data center

- Discovery
- Planning and Optimization
- Development and Validation
- End-to-end Management

Support

Maximize efficiency and productivity with 24x7 support

- 24x7 Remote Hands
- Racking and Stacking
- Workspace, Storage and Vault Space

Get the Nxtra Advantage for your business

Reach

Enhance customer experience and maximize business reach with hyperscale, core and edge data centers across 120+ sites.

Hyper-connect

Create borderless digital infrastructure by leveraging low-latency, carrier-dense and rich interconnect services.

Scalability

Meet elastic business needs with futuristic, hyperscale and PoD-based data center campus spread across Pan Africa.

Sustainability

Contribute to a sustainable world and lower your cost by using green energy-powered data centers (wherever applicable) with highly energy-efficient design and operations.

Reliability

Backed by strong business house 'Airtel Africa Plc', you can rely on us for long-term commitment to your business growth.

Future-proof your infrastructure with Nxtra Africa

We're eager to take your infrastructure to the next level of efficiency and effectiveness.
